Analysis and Comments	Result	Units	Reporting Limit	Notes
2362B Hydroxychloroquine, Blood				
Analysis by High Performance Liquid Chromatography/ Tandem Mass Spectrometry (LC-MS/MS)				
Hydroxychloroquine	None Detected	ng/mL	100	
Synonym(s): Plaquenil®; Oxychloroquine				
Peak plasma concentrations of 410 +/- 130 ng/mL were achieved 2.4 hours after a single oral dose of 400 mg hydroxychloroquine (n = 6). Two cases of hydroxychloroquine overdose (20 g each) were successfully treated throughout cardiovascular collapse and had serum concentrations of 14000 and 26000 ng/mL. The ratio of whole blood concentration to serum or plasma concentration is unknown for this analyte.				

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
