Patient Name 0205U
Patient ID 0205U
Chain 17000163
Age Not Given **DOB** Not Given
Gender Not Given
Workorder 17000163

Received 02/06/2017 14:45

Sample ID 17000163-001
Matrix Urine
Patient Name 0205U
Patient ID 0205U
Container Type Clear vial

Collect Dt/Tm Not Given
Source Not Given

Approx Vol/Weight Not Given

Receipt Notes None Entered

Analysis and Comments	Result	Units	Reporting Limit	Notes
0205U Acetyl Fentanyl and Metabolite, Urine				
Analysis by High Performance Liquid Chromatography/ Tandem Mass Spectrometry (LC-MS/MS)				
Acetyl Fentanyl	None Detected	ng/mL	0.50	
Acetyl fentanyl is a novel non-prescription synthetic opioid that has been implicated in several deaths. This fentanyl analog was previously undocumented in illicit drug use and is estimated to be five times more potent than heroin. Several state agencies have issued public health warnings. The Centers for Disease Control (CDC) has recommended increased vigilance by public health agencies, emergency departments, state laboratories, medical examiners, and coroners for patients with symptoms consistent with opioid overdose. It is also recommended that if a fentanyl immunoassay (e.g., ELISA) produces a positive result additional confirmation testing be performed and that this testing should include fentanyl and its analogs, including acetyl fentanyl.				
Acetyl Norfentanyl	None Detected	ng/mL	1.0	

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
