Analysis and Comments	Result	Units	Reporting Limit	Notes
-----------------------	--------	-------	-----------------	-------

**1481B Deschloroetizolam, Meclonazepam, and Pyrazolam, Blood**

Analysis by High Performance Liquid Chromatography/  
Tandem Mass Spectrometry (LC-MS/MS)

Pyrazolam	50	ng/mL	5.0	
-----------	----	-------	-----	--

Comment: Substance(s) known to interfere with the identity and/or quantity of the reported result: Oxazepam

Pyrazolam is a benzodiazepine that is used as a novel psychoactive substance. It is reported to have CNS depressant properties and shares anticonvulsant, muscle relaxant, hypnotic, anxiolytic and sedative effects with other benzodiazepines. It is not marketed for use as a pharmaceutical product in any country.

The peak serum concentration following a single 1 mg oral dose was reported to be approximately 50 ng/mL at 3 hours. Pyrazolam may be detected in serum for at least 4 days after use. The reported half-life is 17 hours.

The blood to serum/plasma ratio is not known.

Meclonazepam	50	ng/mL	5.0	
--------------	----	-------	-----	--
