------------------------------	---------------	--------------	------------------------	--------------

Deschloroetizolam is a benzodiazepine that is used as a novel psychoactive substance.

It is reported to have CNS depressant properties and shares anticonvulsant, muscle relaxant, hypnotic, anxiolytic and sedative effects with other benzodiazepines. It is not marketed for use as a pharmaceutical product in any country.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
