1828B Dronedarone, Blood

Analysis by High Performance Liquid Chromatography/
Tandem Mass Spectrometry (LC-MS/MS)

Dronedarone	None Detected	mcg/mL	0.020	
Synonym(s): Multaq®				

Healthy volunteers given 400 mg dronedarone twice daily achieved steady state peak plasma concentrations of 0.084 to 0.15 mcg/mL after four to eight days. The ratio of whole blood concentration to serum or plasma concentration is unknown for this analyte.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
