3232B Omeprazole / Esomeprazole, Blood

Analysis by High Performance Liquid Chromatography/
Tandem Mass Spectrometry (LC-MS/MS)

Omeprazole / Esomeprazole Synonym(s): Nexium®; Prilosec®	None Detected	mcg/mL	0.10	
---	---------------	--------	------	--

Peak plasma concentrations at 0.4 hours following a single 20 mg dose of esomeprazole: 0.58 mcg/mL and 1.9 hours following a single 20 mg dose of omeprazole: 0.21 mcg/mL. This test is not chiral specific and cannot distinguish between omeprazole and esomeprazole. The blood to plasma ratio of omeprazole is approximately 0.6.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
