4367B Teriflunomide (Pre-Pregnancy Monitoring), Blood

Analysis by High Performance Liquid Chromatography/Mass Spectrometry (LC/MS)

Teriflunomide	20	ng/mL	5.0	ELEVATED
---------------	----	-------	-----	----------

Synonym(s): Aubagio®

Teriflunomide is indicated for the treatment of patients with relapsing forms of multiple sclerosis.

Following completion of an elimination regimen, plasma concentrations should be determined twice at least 14 days apart to verify that concentrations are less than 20 ng/mL. The blood to plasma ratio is 0.5 to 0.7. The drug carries a black box warning for hepatotoxicity and teratogenicity.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
