4486FL Titanium, Fluid

Analysis by Inductively Coupled Plasma/Mass Spectrometry (ICP/MS)

Titanium	50	mcg/L	10	
No reference data available. Not for clinical diagnostic purposes.				

Specimens for elemental testing should be collected in certified metal-free containers. Elevated results for elemental testing may be caused by environmental contamination at the time of specimen collection and should be interpreted accordingly. It is recommended that unexpected elevated results be verified by testing another specimen.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
